

T-4 Orange County Water District Facility Tour

Date: Tuesday, July 30, 2024

Time: 9:30 AM – 12:30 PM

Note: Limited to 20 participants

The Orange County Water District (OCWD) was one of the first entities to build a managed in-channel recharge project. Now, with more than 2 dozen basins in Anaheim and Orange Counties they maintain one of the most advanced aquifer recharge systems. Their goal is to refill the Orange County groundwater basin while controlling saltwater intrusion. We'll go to their headquarters first for a briefing, then our tour guide will join us on the bus as we visit several recharge basins. OCWD is pleased to make this opportunity available and share their history of groundwater recharge.

Tour Requirements: Participants must be 11 years of age or older, able to take the walking tour and manage stairs, wear closed toe shoes.

Cost: \$60 per person.

Includes: Roundtrip transportation between Marriott Anaheim and OCWD headquarters, and then out to several recharge sites.
